

CLOUD NATIVE OVERVIEW

Get a targeted overview of the cloud native ecosystem thanks to our customized training courses.

Problem

The cloud native ecosystem not only consists of an incredible number of different technologies, but also includes many organizational developments, some of which are new, such as DevSecOps, CI/CD etc. It can be incredibly time-consuming to get an overview and separate the sheep from the goats.

Key features

- Training ½ or 1 day - tailored to you.
- Participants: 5-20 persons
- On-Site or Online
- Options:
 - Technical – for administrators and/or Developers
 - Business – for C-Level, Division- or Project Managers
- Price: 800 CHF per person and day.

Solution

With our Cloud Native Overview in the form of a training course tailored to your needs, you not only get a good overview of the current state of technological solutions, but also a deeper understanding of how this can affect your organization, what modernization options are available and what benefits this will bring you.

Benefits

- Overview of the technologies relevant for you
- You can compare the solutions and make more informed decisions.
- You understand the advantages of cloud native.
- Understand the different modernization options.
- Understand how your organization should adapt to get the most out of cloud native.
