CLOUD NATIVE TECHNICAL DEEP-DIVE

Immerse yourself in technical depth with our customized technology workshops.

Problem

There are lots of training courses online, some of which are free. You can also find a lot of documentation. To be fit for the specific requirements of the company in depth, technical experts spend a lot of time on self-study. Time that is often lacking or leads to unnecessary delays.

Solution

From specialists for specialists - practical training tailored to your specific needs. Depending on the technology, we take the necessary time to go into technical depth and apply what we have learned directly in a laboratory environment.

Key features

- Training with hands-on, tailored to you.
- Number of participants: 5-20 people.
- Duration: Depending on topic and depth.
- On site or online.
- Price: CHF 1'000 per person per day.

Benefits

- Your experts learn exactly what is relevant for your company in a targeted manner.
- You will learn many additional tips and tricks from our practical experience.
- You will learn how to avoid stumbling blocks before they slow you down.
